

Hello St. Luke's!

We hope you are well.

We've come to the end of Zero Carbon Schools 2022-23! The whole team at Green Schools Project would like to say a **huge congratulations to you and all your pupils** for your hard work and collective action this year in helping create a more hopeful future.

You've shown that, as a school, you are committed to empowering young people to understand the climate crisis and take pupil-led collective action to reduce its impact! You've calculated the school's carbon footprint and begun the journey towards zero carbon emissions. You've engaged pupils and staff across the school in solutions-focused climate action. You've involved the wider school community and beyond in carbon reducing activities and the reasons we need climate action now.

Over 80 schools from across the UK took part this year. Whether you took huge steps to empower your pupils and reduce the school's carbon footprint or have just begun your journey, you are part of a growing group of schools taking action for a greener, healthier and more hopeful future.

We are really grateful for all the hard work and enthusiasm you've put in so we've attached a certificate to show you've been an active part of the programme. We would love it if you were to display this somewhere so your whole school community can celebrate too.

The journey to become a Zero Carbon School takes more than one year though!

Our aim is to continue to work with and support schools year on year as you continue to work on reducing your carbon footprint and improving climate education for your pupils.

Please sign up to the 2023-24 programme by completing this [school agreement](#). We will help you on your journey to embedding climate and nature learning and action across your whole school community. See the [Zero Carbon Schools Information Document 2023-24](#) for more information.

Congratulations, from all of us, on your work this year. We hope you have an enjoyable and restful summer holiday and come back ready to continue your journey towards Zero Carbon next year!

A huge thanks,

From all the team at Green Schools Project

Nell Byron (she/her)
